

High Density Copper / Fiber Cassette Sleeve, 0U, 1-Cassette Capacity

MODEL NUMBER: N484-00U

Description

Tripp Lite's N484-00U is a compact, 0U chassis that allows you to mount a single High Density Copper / Fiber Cassette on the metal surface of any rack enclosure, cable manager, or other similar structure via the attached magnets. Unlike standard rackmount solutions, the N484-00U allows you to locate a copper / fiber cassette where standard chassis' cannot go, connecting cables at the cable manager where they are being routed through. It's also perfect for adding copper / fiber connectivity where no existing rack infrastructure exists, such as a remote work station, a new build-out, or temporary install locations. Choose amongst a wide array of cassettes ranging from LC and MTP fiber to RJ45 copper. Fiber cassettes come in multiple variations, allowing you to connect and interconnect your 10Gb, 40Gb, and 100/120Gb equipment. In addition, it gives you the flexibility to add as you go, without needing to purchase a 1U chassis when you only need to add one more cassette.

Features

- Space Saving 0U design allows a Copper / Fiber Cassette to be mounted on the metal surface of any rack enclosure, cable manager or other similar structure via the attached magnets
- Unlike standard rackmount solutions, the N484-00U allows you to locate a copper / fiber cassette where standard chassis' cannot go, connecting cables at the cable manager where they are being routed through.
- It's also perfect for adding Copper / Fiber connectivity where no existing rack infrastructure exists, such as a remote work station, a new build-out, or temporary install locations
- Choose amongst a wide array of cassettes ranging from LC and MTP fiber to RJ45 copper, all in a single 0U sleeve
- Fiber cassettes allow for the connection and interconnection of 10Gb, 40Gb, and 100/120Gb equipment
- Gives you the flexibility to add as you go, without needing to purchase a 1U chassis when you only need to add one more cassette.
